

MATERIAL HANDLING

We have been producing high quality durable containers for well over three decades. Our commitment to excellence combined with customer input has helped us develop the most innovative and user friendly products in the industry.

Strong and durable containers designed for your needs.

WWW.FLEXAHOPPER.COM

WE HAVE THE RIGHT CONTAINER FOR YOU.

Seafood, meat and poultry, waste handling, storage, you name it.

Since 1967 we have specialized in producing containers and custom solutions for a variety of uses. Our Insul-tainer™ line of products utilize industry leading techniques to provide the most durable, long-lasting insulated containers in the market.

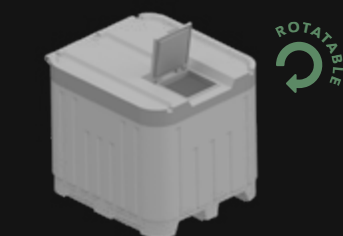

We offer world-class customer service and continue to invest in advanced processing techniques and quality control systems. Whether it's fish, poultry, waste handling or storage, we have the right container for you.

OUR COMMITMENT TO GREEN

We power our facility through our own solar array installed on our rooftop, setting us apart from our competitors

CHANGE IS IN THE WIND

Our secondary source of energy comes from wind generated electricity

“Since 2007 Flexahopper has demonstrated a strong commitment with the environment by using energy that comes from wind and water sources across Canada.”

COMPATIBILITY

We understand the importance of interchangeability and functionality through the process. Our totes are compatible with existing totes in the market.
