

Protective Lining Corporation

Vacuum Formed Drum & Pail Inserts

Provides additional PROTECTION for your containers and products.

5, 30 & 55 Gallon Inserts

These pail and drum inserts are vacuum formed and are constructed without any seams. They help to extend the life of containers and allow for a cleaner environment when processing any product.

Disposing of materials is also easier. Great for use with high speed pumping and mixing. Used mostly for storing paints, inks, coatings, foods, cosmetics, adhesives and pharmaceutical products.

**Also available with accordion pleats for height adjustment in 30 and 55 gallon capacities.*

Straight Sided and Accordion

**Also available with antistat*

5-Gallon Pail Insert

PRODUCT CODE	DESCRIPTION
