

The On-Ramp to Smarter, Sustainable Supply Chains

What is APS?

Adaptive Pallet Solutions is a next-generation pallet platform designed for modern supply chains — where automation, labor efficiency, operational precision, and resilience matter more than ever.

We provide precision-engineered, fully recyclable plastic pallets, purpose-built for closed-loop and high-volume environments, and designed to integrate seamlessly into automated operations.

Backed by Greystone Logistics, a publicly traded North American manufacturer serving Fortune 500 customers, APS combines manufacturing scale with a software-and-data mindset.

The Problem: Why Pallets Quietly Cost You

No Visibility

Hidden Labor Cost

Damage & Risk

Automation Friction

Start with the pallet. Change everything.

What's Possible With Better APS Pallets

Visibility

Turn pallets into measurable assets across the supply chain

Consistency

Precision-engineered dimensions remove variability from automated handling

Durability

Built to last often over 10x longer than wood, reducing breakage and replacement

Safety

No nails, splinters, or debris — lowering handling risk and cleanup

Sustainability

100% recyclable and reusable, designed for modern ESG reporting

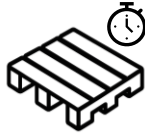

Our Key Differentiator: Technology

Pallets & Technology Made In The U.S.A

Our Value Proposition

Why Plastic?

Lasts **10x longer** lifespan
than wood

**Prioritizes employee
safety**

Avoids large **lumber
footprint**

Optimized for **tech
integration**

Why Lease?

Enabling **access to
premium** pallets

Fixed & predictable
long-term pricing

**Simplified payment
structure**

**Retrieval & recycling
guaranteed**

Why Adaptive Pallets?

Instant, accurate pallet
inventory **visibility**

Proactive risk detection
via monitoring

Data visibility creates
smarter decisions

Positioned for AI
efficiency initiatives

Proven Performance

Budget Friendly

Data Advantage
